EXPERIENCE

iink Payments — Staff Software Engineer

NOVEMBER 2023 - PRESENT

- Spearheaded a move to CI/CD and built CDK based deployments to AWS, auto scaling based on traffic, as well as on-demand test deployments for pull requests
- Planned and executed a migration from Django template based UIs to React including creating a component library, Storybook documentation, and training materials
- Set up automated end-to-end regression testing with Playwright, a unit test suite with coverage enforcement, and visual regression testing for new React UIs

Evolve Vacation Rental — Lead Software Engineer

JUNE 2022 - MAY 2023

- Built a reusable, themeable design system using React, Radix UI, and TailwindCSS documented with Storybook
- Set up CI/CD workflows in GitLab with CDK based deployments to AWS as part of a migration away from Salesforce hosted pages
- Owned development of an owner dashboard app built entirely with the new design system and deployment process

Community.com — Senior Software Engineer

JANUARY 2021 - JUNE 2022

- Led front end development for a team focusing on client onboarding, billing, and member growth
- Planned and implemented features for lead generation widgets installable on client websites including k-factor tracking to attribute leads across multiple social media shares

Guild Education — Staff Software Engineer / Engineering Manager

JULY 2019 - JANUARY 2021

- Led two development teams, one responsible for merchandising and integration with academic partners, and the other responsible for internal tooling and branding
- Integrated course listings with Department of Labor data to create a quiz for guiding students into appropriate degree programs based on location, interests, timeline, and desired salary ranges

SKILLS

TypeScript

Python

Node.js

React

React Native

Expo

Next.js

Django

Design systems

CSS

Tailwind

Cypress

Playwright

Jest

React Testing Library

Storybook

Devops

CI/CD

AWS CDK

Docker

Bash

SQL/Postgres

Hotel Engine — *Senior Software Engineer → Director of Engineering*

MARCH 2016 - JULY 2019

- Initially responsible for UI and mobile app development in React and React Native
- Planned and implemented a new architecture that reduced lodging search times by 80% and hosting costs by 50%
- Scaled the engineering team to support 3000% growth in user base and 1500% growth in revenue
- Led integration and security audit with the state of Texas to utilize Hotel Engine as their preferred travel provider

FoodServiceWarehouse.com — *Senior Software Engineer*

JULY 2012 - MARCH 2016

- Responsible for feature development on an e-commerce site as well as internal merchandising tools
