ERIC CADOW

Evolve Vacation Rental, Denver CO JUNE 2022 – MAY 2023
Lead Software Engineer

React / Cypress / TypeScript / Storybook / TailwindCSS / Radix / Next.js / GitlabCI

I came to Evolve for the opportunity to build out a design system for their new Brand 2.0 initiative. The mockups and design tokens were provided by the design team and components were implemented in React with Radix UI & TailwindCSS. Two themes were created for the components, one for owner facing UIs and the other for guest facing UIs. The component library is documented with Storybook, and under unit and visual regression test suites with Cypress and running in a CI/CD pipeline in Gitlab with automated package publishing.

Following the initial implementation of the design system I lead a newly formed team responsible for the implementation of a new owner dashboard app using the new tooling and libraries created.

Community.com, Santa Monica CA JANUARY 2021 – JUNE 2022
Senior Software Engineer

React / Cypress / TypeScript / Storybook / CircleCI / AWS

At Community I lead front end development for the team responsible for client onboarding, billing, and member growth/lead generation features. I was responsible for the architecture and implementation of the member pop-up for "leaders" to add to their websites, theming tools for leaders, and associated user tracking. I also implemented a k-factor tracking system on shared media from leaders to track how many "hops" a shared piece of content went through to reach users that signed up after seeing it.

Guild Education, Denver CO JULY 2019 – JANUARY 2021
Engineering Manager, Staff Software Engineer

React / Jest / Cypress / TypeScript / Python / Postgres / Heroku / AWS / CircleCI

At Guild I managed two teams, one focused on program merchandising and the other responsible for maintenance of our design system and other internal tooling. I split my time between development, front-end architecture, and management duties.

Hotel Engine, Denver CO MARCH 2016 – JULY 2019
Senior Software Engineer, Software Architect, Director of Engineering

Node.js / React / React Native / AngularJS / TypeScript / Postgres / Heroku / AWS / CircleCI

Over my 3 years at Hotel Engine I progressed from Front End Engineer on a small team to a Director role. I worked to grow the team, improve the architecture, and scale the app efficiently as the company grew its revenue by 1,500% and its user base by 3,100%.

FoodServiceWarehouse.com, Englewood CO JANUARY 2013 – MARCH 2016
Software Engineer

AngularJS / ASP.NET / MSSQL / Node.js (Hapi) / Jenkins / Ansible / Nginx

I was responsible for development of the e-commerce website, related tools for merchandising & SEO, and supporting infrastructure.

PRIDE Marketing & Procurement, Englewood CO
Systems Administrator

JULY 2012 — JANUARY 2013

Coface Collections NA, Metairie LA
Systems Administrator

MAY 2009 — JULY 2012
